PROFILE

My name is Wessel Verstelle, I am a creative and driven engineer with a strong background in electronics, prototyping and design. Through my work in student teams and associations, I have developed solid skills in leadership, public relations, and technical communication. I enjoy combining hands-on problem solving with presenting and connecting people, making me effective in both technical and social environments. Curious and proactive by nature, I thrive in dynamic settings where I can contribute, learn, and innovate.
